

Glove Boxes

OUR STANDARD SOLUTION

Our standard Glove Box is a fully customized unit. Every detail of the machine from the design, to its software and validation is tailor made around your requirements.

AN END USER POINT OF VIEW

You tell us what you need and we recommend how to design it. We use our own designed glove boxes every day to provide Europe's largest micronization service. We are experts on how to operate a glove box, that's the difference.

SAFETY FIRST

The reason why you are looking for a glove box is because you care about your operators. You don't make compromises when it comes to safety and neither do we.
